LARGE SCALE 1970S CONCRETE PLANTER TROUGH IN THE MANNER OF WILLY GUHL

SKU: GD1564

£1,865.00

A large scale Mid Century Concrete Planter, freshly salvaged. The piece is in the style of Willy Guhl - not at all attributed to the designer but certainly of its period, with rounded corners.

Of huge scale at over 2.5m in length, this will make a fantastic garden feature and due to its weight it is ideal for use with larger plants / trees where stability is required.

The concrete is in good structural condition, the piece has several small losses and marks and has a great overall aged patina, ideally suited to a mature garden setting where it would blend in perfectly. If a cleaner look is required then the piece could be cleaned or indeed polished to provide a modernist aesthetic. The planter is shown full but can be emptied prior to delivery.

ADDITIONAL INFORMATION

Age	1970s

Material	Concrete
Origin	British
Dimensions	H49cm x L257cm x W64cm / H19.25" x L101" x W25"
