ORIGINAL EARLY ANGLEPOISE LAMP

SKU: GD1230

£595.00

This early 2 step Herbert Terry Anglepoise lamp (model 1227) has the perfect look for those wanting something different. The paint finish is completely untouched and in original as found condition, however, the lamp has been fully checked and re-wired by a reputable lighting studio in London. What makes this example unique is that it retains all its original metal fittings including the brown Bakelite switch holder which was in good working order and was retained as part of the re-wire.

A great looking lamp with perfectly aged patina.

The lamp is fitted with 3m long cable to accommodate modern day requirements.
